RE: 1997 Environmental Event in Butterfield Canyon Drainage and Dansie Family Farm Property

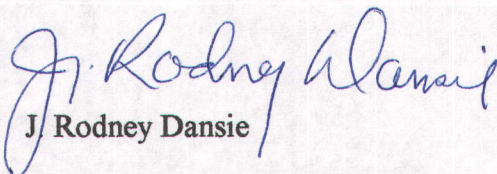

Dear Mr McGowan Jackson

Thanks for your concern when we discussed the above referenced event. I am making a formal request that the issue is re-visited since I have become aware of a Mining Application number Act-035-002 dated August 9, 1976 covering these types of events and the obligation under the Mined Land Reclamation Contract dated the 28 th of September 1978. The Agreement between Kennecott Copper Corporation and the Board of Oil, Gas and Mining appears to require that such events be cleaned up and restored. This request is being made as per instructions of the Division of Oil, Gas and Mining with the hope that a full report of the event and cleanup yet to be performed can be made available to Division and to Dansie's regarding how the cleanup can be accomplished. The Mine Environmental Department did some reports and plans as to how the clean up could be accomplished and should have a full file on the event which has not been cleaned up.

We would appreciate you cooperation on developing a plan for getting the spill cleaned up and the property re-stored to before the event condition.

If you have any questions or need more information please contact Rodney Dansie at the above address. Thanks for you cooperation in this matter.

Regards

J. Rodney Dansie
